QUICKIE F55

Break all the barriers. Experience freedom.

The new F55 will appeal to you not only because of its innovative design, but above all, because of the multitude of technical features and options which can be fitted. The stable, rigid chassis ensures the highest level of comfort while traveling and the new optional riser function will give you that essential extra freedom in your daily life.

QUICKIE F55

The all-rounder

Whether used indoors or outside – the F55 is at home in any environment. The high-quality, lightweight metal wheel rims and the fitted-as-standard independent suspension are attractive design details which also offer excellent comfort when travelling outdoors. By using the optional kerb-climber, kerbs and steps up to a height of 10 cm can be conquered easily. The main frame, which is made of 50 mm diameter tubular steel, will impress you not only by its appearance, but also ensures the highest level of rigidity. Good travel performance and exemplary safety are automatically part of the package.

With its small overall dimensions and excellent manoeuvrability, the F55 is also impressive and flexible indoors.

Individuality without compromise

Easy adjustment to satisfy individual requirements was an absolute must in the development of the F55. As standard, the seat depth and width can be adjusted in increments. In addition, the highest level of flexibility was considered in setting the angle of inclination of the back and seat. With an angle of up to 20°, the inclination of the seat can be set to meet the most varied requirements.

As an option, the F55 can be fitted with power adjustable back or seat settings and can be equipped with height adjustable legrests with the corresponding length compensation. Of course, all these functions can be operated by using the joystick of the Pilot+ control pod.

Unquestionable ease of service

Optimum flexibility is certainly the deciding argument when adjusting a powerchair. When this additional individuality is combined with very easy servicing, then virtually no requirement is left unmet. Easy access to all components, a removable battery compartment and the numerous and varied optional features are just a few examples of the servicing concepts which were at the fore during the development of the F55. Even the fitting of optional features can be carried out easily and without problem on the F55.

Optional integrated lights and indicators

Full independent adjustable rear wheel suspension

Easy battery access

High ambitions

The optional riser function on the F55 gives you the highest level of freedom of movement. Infinitely variable, the seat unit of this powerchair can be raised up to approx. 30 cm. In this way for example, shelves can be reached easily and comfortably, giving total independence. At the same time the riser option can also be combined with power seat inclination, and back and legrest adjustment.

Even with the riser function, the low seat height of 52 cm is still maintained.

Seat height and angle setting – easy and functional

The chair can be fitted with all power options, even with the seat riser function

Technical information

Total width: 64 cm

Total length inc. foot rests: 110 cm

Seat height: 52 cm (min.) - 82 cm (max.)

Seat width: 41 - 51 cm

Seat depth: 41 - 51 cm (dep. on options fitted)

Standard back height: 55 cm

Seat angle: 0° - 20°

Back angle: 6°

Seatlift (option): max. 30 cm

Turning radius: 87 cm

Weight: from 110 kg

Battery: 56 Ah (C₂₀)

Maximum gradient: 18 %

Range: 35 km

Approved user weight: 127 kg *

**This information applies to the standard specification. For further user weight information please refer to your order form.*

*Colours:
candy purple, candy red,
candy teal, standard blue,
standard black, forest green*
